The paper presents a design study of introducing QR codes to a restaurant chain operation. This topic, in my opinion, is suitable to be presented at the conference, but writing must be improved before it gets accepted.

Examples of language errors:

that make the customers to do easily.

QR payment can support system on easy payment is the most feasible model to be implemented.

MSMEs -abbreviation not explained

this business starts from a sidewalk business, from a wheelbarrow. - grammar

a system for the results of its mato system. – what is mato system? All notions should be explained before they are used

to improve the competitiveness of local restaurants should be done

reduced by 2.5% for zakat, - what is zakat?

themselves or the entourage

less sophisticated asking for a fee, while they have not eaten.

And so on..
