| 2. | Shamki, Dhiaa (2012) "Value Relevance of Earnings and Book Value: Evidence from Jordan" (p. 135-136)                                    | <b>Dependent</b><br>Share Price<br><br><b>Independen</b><br>Earnings per share<br><br>Change in Earnings<br><br>Book Value per share<br><br>Change in Book Value | Share Price i for firm i at the end of a year t<br><br>Share return i for firm i at the end of a year t<br><br>earnings per share for firm i at the end of a year t<br><br>change in earnings per share for firm i at the end of a year t<br><br>book value of equity per share for firm i at the end of a year t<br><br>change in book value of equity per share for firm i at the end of a year t | Study's sample is the Jordanian industrial firms listed in ASE 1992-2002. The data from Amman Stock Exchange Information Center (ASEIC). Total of 198 firms-years and (1188) observations-years (18 firms * 6 variabels * 11 years) will enter the analysis to obtain the requested findings | The value relevance of earnings is increased relativ to the two valuation models, while that of book value is declined relativ to <i>return</i> model. Combining earnings with book value increased the value relevance of earnings and insignificantly the value relevance of book value relativ to <i>Price</i> model, while it increased the value relevance of earnings and declined that of book value relativ to <i>return</i> model<br><br>Tipe Studi : Relatif |
|    | Omokhudu, Okuns Omokhoje ; Ibadin, Peter Okoeguale (2015) "The Value Relevance of Accounting Information: Evidence from Nigeria" (p.24) | <b>Dependent</b><br>Share Price<br><br><b>Independen</b><br>Earnings per share<br><br>Book Value per share<br><br>Cash Flow                                      | stock Price at three months and six months after year end<br><br>earnings per share for firm i at the end of a year t<br><br>book value of equity per share for firm i at the end of a year t<br><br>cash flow from operation for firm i at the end of a year t   | A random sample of forty-seven firms was obtained, giving a sample of 940 firm-years. The data used in the analysis consist of 47 firms quoted on the Nigerian Stock Exchange from 1994 to 2013, a period of twenty years  | We find that the coefficient estimates of earnings, cash flow and dividends are significant across the four estimation techniques employed in the study. The implication is that these variabels are strongly associated with firm value and thus value relevant<br><br>Tipe Studi : Marjinal  |
